

Health & Safety Policy

Our aim is to achieve the highest standards in terms of the protection of health, safety and the environment. Linear Projects recognises their responsibilities to the workforce, clients and contractors working alongside them as well as visitors and the surrounding public and believe that successful management of Health, Safety (H&S) and environmental issues is vital to the success and continual improvement of the business.

In order to achieve this aim, Linear Projects has implemented a fully developed Safety Management System (SMS) as outlined in HSG 65 and reflecting the standards of OHSAS 18001 to ensure that when considering their activities the company carries out the appropriate level of risk assessment and introduces the control measures necessary to reduce the likelihood of accident injury or ill health to its employees and others who might be affected by their activities. The company will ensure that sufficient resources are allocated to the implementation and operation of the SMS and will review the system periodically to ensure its effectiveness.

Linear Projects is committed to complying with all applicable UK legislation and other relevant requirements to which it subscribes, and to providing adequate resources to fulfil its Policy obligations. To ensure appropriate Director level involvement, Mr Stephen Holmes been designated as having overall responsibility for the formulation and implementation of the Policy and underpinning arrangements and for the communication of these arrangements to all relevant parties.

Signed:

A handwritten signature in black ink, appearing to read "S Holmes".

Stephen Holmes
Managing Director
